SUNTECH[®]

All for the Family

About Us

A company, SUNTECH, was established as Corporation in 1991 and it was founded by the former president who was one of the top well-skilled welders in Japan. Our main products made of stainless steel have been used as the most important plant equipment in the various fields of industrial facilities such as "Water and Sewerage, Chemical, Food, Medicinal, Pulp, Semiconductor, and Waste incineration facility." Our products are now used to reduce the cost and energy for the various plant. In addition, not only manufacturing, but also we try to correspond to the drawings such as pressure vessel required from customers such as Engineering Company and the Plant makers. Our best skills inherited from the predecessors those who devoted their life to JAPANESE MONODZUKURI, surely support the foundation of the society behind the scenes. As manufacturing group, SUNTECH, will continue to provide the best products for all over the world. It is your decision to choose who would be your best partner, and we are highly motivated and so ready to dedicate ourselves to accomplish your vision and contribute to your goals by fabricating industrial equipment.

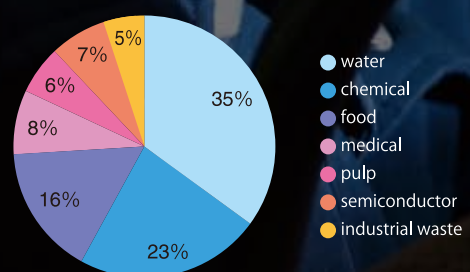

High Quality

Our skills are here to support / sustain your technology.

The Shokunin

Shokunin (so called Craftsman) is not about occupation but it is about your professional behavior. Only Those who work hard with their proud can be called as Shokunin.

職人とは職業ではなく、心構えでありプロ意識である。職人とは誇りをもってやっている人

A deepest gratitude resulting from living for others, and being supported by others can transcend our generations, Tomorrow is ours to build.

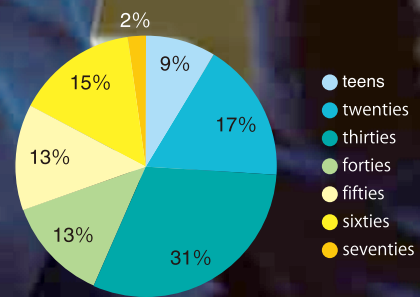

人の為に生き、人に生かされていると感謝する中で生まれる共存意識(仲間意識)は世代を超越する。

Youth

Youth is not a time of life, it is a state of mind

青春とは人生のある一定期間をいうのではなく
心の持ち方をいう

Smile

Pessimism comes from our passions; optimism from the will.

悲観主義とは気分的なものであり楽観主義とは意識的なものである

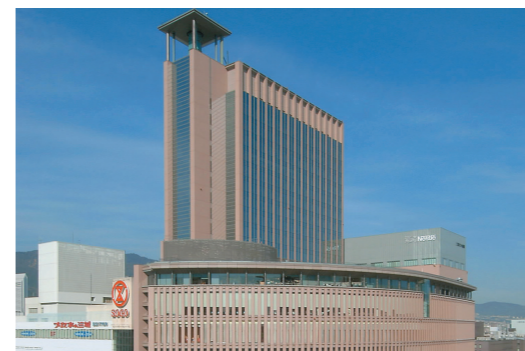

Why do people work? SUNTECH thinks it is "all for the family." We design and manufacture industrial plant equipment as you can find some of them in this catalog. Although these products may not be so familiar in our daily life, they undoubtedly support everyone's life behind the scenes. Such manufacturing (Monodzukuri) has become possible because of the advanced technological capabilities and great skills of the Shokunin (craftsmen) who are truly engaged in the manufacture, and they support not only our company but also Monodzukuri industries of Japan. I want to turn a spotlight on them so that the invaluable nature of Monodzukuri is widely known by many people. In order to provide outstanding products and good services to our customers I think "happiness of the Employees" is the key

principal. I believe good work cannot be done if we neglect the life of the employees and their families, this is the true reason why I made "Employees First Customers Second" as management principal. With the Management Principle and Slogan in our heart, SUNTECH is continuing to make products of which we can be proud in the world. We will continue challenging to grow further without fear for such changes as globalization and diversification. I am ready to dedicate myself to the cause of peace and international cooperation through manufacturing (Monodzukuri). These are my wishes. Many thanks and love
